

HOLLOW METAL WELDERS

FOR STEEL DOORS AND FRAMES

Weld Systems Integrators (WSI) manufactures standard and custom welders for the Steel Door Industry, and offers a wide range of solutions for Hollow Metal Manufacturers making 20 – or 200 – or 2000+ doors and frames per day.

Metal Door and Frame Welders from WSI boost production speed and maximize reliability through their robust, dependable design. Common door parts weldable with WSI-designed welders include:

- End Channels
- Hinge Reinforcements to Door Skins and Frames
- Pressure Plates
- Stud Anchors
- Floor Anchors
- Mortar Guards
- Stiffeners (aka Z-Channels / Hat Sections)
- Lock Boxes / Strike Plates
- Anchor and Plumb Brackets
- Door Seams (with WSI automated MIG Welding Machines)

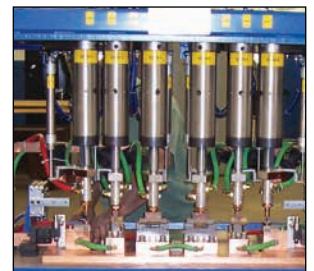

If your company needs one of these welders, or something not mentioned here, just ask! WSI's highly skilled in-house engineering team can tailor or custom design a machine or process for your application.

Short runs to Mass Production. Hollow Metal Door and Frame Welders for every output requirement.

Weld Systems Integrators offers standard and custom welders, from single or multi-gun manual welders to partially or fully-automated welding solutions.

Let Weld Systems Integrators help you choose or design the door welding solution that best fits your manufacturing requirements.

LORS and OTHER LEGACY WELDERS FROM WSI

LEGACY REPLACEMENT PARTS - Weld Systems Integrators provides replacement parts for LORS Machinery welders, as well as door and frame welders manufactured by other companies. We stock or source many common replacement parts and components no longer available from the original equipment manufacturer (OEM). As a stocking importer and master distributor for TECNA, WSI also supports LORS-TECNA Welders.

LEGACY WELDER REPAIRS AND REBUILDS - The WSI repair and service departments provide repair and rebuilding services for LORS Machinery and other legacy welders. This can range from simple adjustments to replacement parts, from repairing to reconditioning and rebuilding machines. We can rewind transformers, repair weld controls, and even re-engineer and manufacture new parts for LORS Door Machines, LORS-TECNA Equipment, and other legacy welders.

LEGACY WELDER SUPPORT - Our customer-oriented team of engineers and technicians provide fast, efficient support for your LORS Machinery, LORS-TECNA, and other legacy welders.

Weld Systems Integrators (WSI) | Resistance Welding. Solved.

Weld Systems Integrators is a manufacturer and distributor of resistance welding equipment and machinery, and integrator of welding automation. Available standard and custom equipment includes:

- Press Type Spot Welders
- Projection Welders
- Rocker arm spot welders
- Seam Welders
- Bench and Micro Welders
- Portable Weld Guns

WSI stocks resistance welding accessories, parts and supplies from select affiliates and partners, including portable spot welding guns, consumables, controls, chillers, transformers and balancers. We support our resistance welding equipment with strong service, training, welding lab testing and contract engineering capabilities.
