

WSI SERIES

Rocker Arm Spot Welders

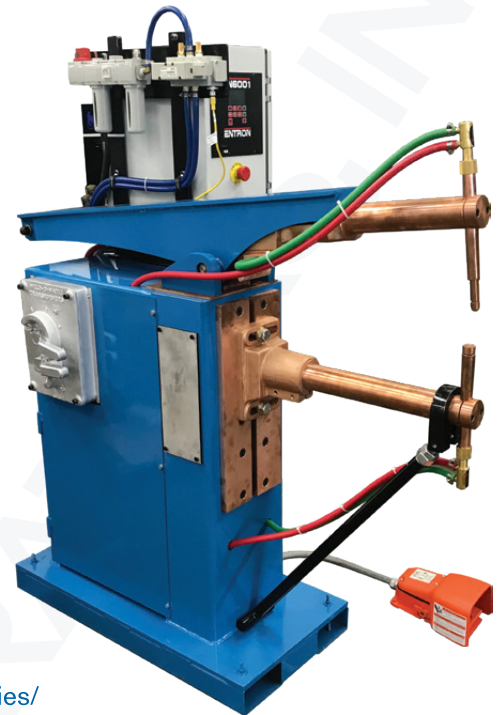

WSI Series Rocker Arm Spot Welders [30 - 150 kVA] from Weld Systems Integrators. Built to standard or custom configurations at our Warrensville Heights, OH location.

Our rocker arm spot Welders feature rugged frame construction, customer choice of weld controls, single-phase AC or three-phase MFDC power supplies, solid copper arms, ejector-type electrode holders and more.

Build your unique rocker arm spot welder!

WSI can build your standard or custom rocker arm spot welder to fit your exact application specifications. Let us know what material you're welding, the thickness of the material, and any special requirements, and we can design a welder to meet your needs.

STANDARD FEATURES

- kVA: 30, 50, 75, 100, 150
- Voltage: 208, 230, 460 and 550
- Throat depths: 12", 18", 24", 30", 36", 42" or 48"
- Single-phase AC / 60 Hz
- Solid copper arms
- Ejector-type electrode holders
- Rugged, heavy-duty all-steel frame
- Double-stage foot switch
- Choice of welding controls
- Water-cooled stacked core transformer
- Forklift pockets
- Air-operated
- Safety stickers installed

OPTIONAL FEATURES / RECOMMENDED UPGRADES

- MFDC or three-phase power supply
- Adjustable, retractable cylinder
- Water chillers, coolant, and re-circulators
- Rapid-fire
- Palm buttons
- Disconnect switch installed into weld control
- Constant current
- UNITROL Soft Touch Safety System
- Head weight tip dresser
- Water hose quick disconnects
- Digital air pressure and water flow switches

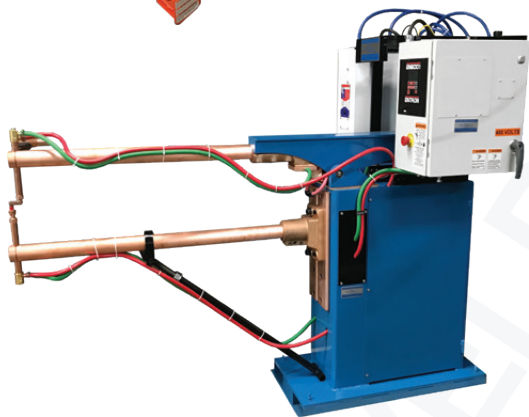

STANDARD ROCKER ARM SPOT WELDER

WSI Rocker Arm Spot Welder – Model 20633

KVA: 50

Arms: 24" throat depth

The WSI Series Rocker Arm Spot Welder [shown] is a 50 kVA rocker welder built for flexible spot welding applications. This welder features a solid steel frame, ENTRON EN6001 weld control and 24" throat depth, solid copper arms.

STEEL DOOR ROCKER ARM SPOT WELDER

WSI Rocker Arm Spot Welder – Model 20680

KVA: 75

Arms: 48" throat depth

The WSI Series Rocker Arm Spot Welder [shown] is a 75 kVA rocker welder built for steel door welding applications. This welder features a solid steel frame, ENTRON EN6001 weld control and 48" throat depth, solid copper arms. In addition, the WSI-recommended upgrade – UNITROL Soft Touch Safety System included, along with adjustable / retractable air cylinder.
